

## Hydrosol- is the life force of the plant in its liquid form

Raw Skin Care's use of Organic Hydrosol instead of traditional toner formulas is the unique difference between just toning and the true healing and balancing concept in skin therapy. Hydrosols are originally indigenous medicine and prevalent medical use in the 20<sup>th</sup> century and its resurgence is back in the medical and wellness practices with more health conclusive data today.

Hydrosols replace, balance and act as a toner but there are no harsh ingredients; so it is healthy for the skin. Many toners on the market today contain harsh, drying alcohols (SD 10-40) that strip the skin and cause further dehydration leading to stinging and burning or causing the skin to overproduce too much oil to make up for water loss. Organic hydrosol toners help hydrate the skin and make it more receptive to what you are going to apply after. The hydration you receive can also help to calm irritated facial skin.

Organic hydrosols are created several organic ways either during the distillation process used to make essential oil extractions and in a straight controlled distillation. Depending on which plant it comes from, they have different characteristics and benefits but all are extremely comfortable and hydrating to the skin.

---

Purity.....Calendula is a well-known and loved herb for its therapeutic properties, and this true Calendula Hydrosol has an infinite amount of possible uses! Beneficial for skin disorders, rashes, hotspots, epidermal healing, scratches, abrasions, sunburn, scars, and an all around skin tonic. Calendula Hydrosol has anti-inflammatory, anti-septic, and astringent properties. The aroma of our Calendula hydrosol is refreshing, soothing, sweet, and mildly floral.
